

Sensonic Voice™ Controlled Smart Fan

Best Practices

- Give your Sensonic Voice™ Controlled Fan a unique name that does not contain the word “fan” or “light”. Light and fan are commonly used in utterance for Alexa/Google to operate this product.
- Once connected to Alexa/Google, ensure that your preferred music streaming services are set up properly in their respective apps.
 - Spotify is not integrated with this product currently. If you would like to listen to music on Spotify, you must use a Bluetooth connection from your phone.
- Voice commands will prioritize the function of the light over the fan. See examples below.
- This product works like any Alexa Device. Common voice utterances using Master Bath as the fan’s name:
 - *“Alexa, turn Master Bath on.”*
 - This will turn on the light only.
 - *“Alexa, turn on fan on Master Bath.”*
 - This will turn on both the fan and light.
 - *“Alexa, turn off Master Bath.”*
 - This will turn off the light only.
 - The fan and light are independently controlled when already turned on.
 - *“Alexa, play my music.”*
 - You can stream music through your preferred streaming service.
 - *“Alexa, change Master Bath light to Soft White.”*
 - Refer to Quickstart Guide for other color options.
 - *“Alexa, change Master Bath brightness to 50%.”*
 - Brightness and speaker volume can both be controlled by percentages.
