

Whole house balanced ventilation just got a lot more flexible.

Any way you mount it Broan's HRV190FLS adds up to fresher air. We simplified installation with a 180° flippable design, enabling flexible placement in any application to save time and money. Heat is transferred from incoming cold, fresh air to outgoing warm air—without mixing them. That means 80% of the energy you paid for stays inside, and humidity levels are optimized for greater comfort. Step up to fresh, filtered air and a healthier environment.

Ideal for mid to large homes.

- Flippable for installation flexibility
- Powerful intake/exhaust airflow
- Very quiet operation ensures homeowner comfort
- Quick, effective airflow adjustability
- Pressure taps, balancing dampers and straps for insulated ducts ensure quick, effective installation
- Integrated "Snap-in" drain system

Model number	HRV190FLS
Ports location/size	Side Flippable/6"
Min/Max continuous airflow (CFM at 0.2 w.g.)	82–215
Min/Max continuous airflow (CFM at 0.4 w.g.)	82–192
Electrical consumption	71W
Apparent sensible efficiency at 32°F	75%
Sensible recovery efficiency at 32°F	65%
Sensible recovery efficiency at -13°F	60%
Filtration	15PPI Washable
Dimensions (HxWxD inches)	17 x 35 x 18
Defrosting system	Recirculation
Warranty on parts/core	5 years/ Limited lifetime
Weight (approximately)	65 lbs. (29.5 kg)
Control compatibility	VT6W, VB60W, VT4W, VT8W, VT7W

Flexible 180° Installation

1 Fresh air from outside

2 Exhaust air from building

3 Exhaust air to outside

4 Fresh air to building
