

BROAN®

We took the under-cabinet category **COMPLETELY OVER THE TOP.**

Broan took a fresh look at the under-cabinet range hood, from capture performance to design to control. The result? A product line that redefines the category and blends perfectly with contemporary appliance designs.

The Broan Captur™ system ensures on average 98.5% capture efficiency for unsurpassed ventilation performance.

The quiet Captur™ system—a combination of blower design, air flow management and filtration—provides the most effective smoke and odor capture in its class.

Shown: Shadowgraph of two boiling pots of water.

Every detail is fresh and new, from elegant curves to bold angles.

Sahale

Glacier

Spire

Multiple blower configurations up to 600 CFM depending on model.

APPLIANCE-MATCHING FINISHES

STAINLESS

BLACK STAINLESS

BLACK

WHITE

BISQUE

Bold, fresh and feature packed.

THE UNDER-CABINET RANGE HOOD IS REDEFINED.

When we set out to improve every aspect of under-cabinet kitchen ventilation, removing heat, smoke and moisture was key. So we designed the blower wheel and motor assembly to move more air with greater efficiency. Unique filters remove grease effectively without restricting airflow, and centric blower placement provides superior capture over all burners. It all adds up to better performance, quiet operation and less energy use.

LIGHTING

Brilliant LED lighting is designed to beat the heat of cooking environments, last longer without dimming and includes a 3-year warranty. Models with halogen lighting are also available, casting a warm gentle glow.

CONTROL, JUST THE WAY YOU WANT IT

Broan provides models with the control options consumers want most, from intuitive direct input switches to sophisticated, easy-to-clean touch controls. All models offer ADA compliance and may be operated remotely.

INTERCHANGEABLE FILTERS

Open-mesh

Micro-mesh

Deluxe Micro-mesh

Hybrid-baffle

Dishwasher-safe filters install without tools. Upgrade with optional filter designs best suited to your cooking and style preferences.

SINGLE-PERSON INSTALLATION—SIMPLIFIED

Two EZ1 brackets hold the hood in place while you make electrical and ducting connections.
