

Smell Better, Sound Better, Feel Better: Broan® Launches Bluetooth Speaker Fan with Wake-Up Simulation Lighting

Broan® to Launch Industry's First Ventilation Fan with Bluetooth Speaker and Sunrise Color-Correlated Temperature Lighting at IBS 2020

HARTFORD, Wis. (February 2020) – From home makeovers to personal ones, the new year brings on a multitude of special projects. As millions bring in the new year with a “new year, new you” mantra, Broan®, came up with a way to upgrade to “new year, new ROOM” with the **Broan Sunrise Sensonic™ Speaker Fan, the industry’s first ventilation fan with Bluetooth speaker and customizable color-correlated temperature lighting**. The industry leader in residential ventilation and air quality solutions will introduce the latest innovation in their mission to ensure everyone can Come Home to Fresh Air™ at this year’s [International Builders’ Show](#), happening January 21-23 in Las Vegas.

From playlists and podcasts to customizing the perfect wake up or makeup lighting, the Broan Sunrise Sensonic™ Speaker Fan with color-correlated temperature lighting allows homeowners to personalize their everyday routines while quietly eliminating humidity and indoor air pollution in the bathroom, home gym, nursery and any other high-moisture rooms.

The adjustable Sunrise Color-Correlated Temperature (CCT) Lighting creates an opportunity for users to alter and customize their moods, energy levels and daily routines based on which of the daylight color temperatures they choose via the wall control. Ranging from nightlight mode to direct noon sunlight, the revolutionary LED lights are the first user-controlled adjustable white light and fan combination to mimic natural daylight scenarios.

Unlike wireless speakers that require counter space, users can enjoy entertainment and privacy at the touch of a button. Concealed behind the sleek CCT lighting are High-Fidelity Sensonic™ Stereo Speakers that seamlessly connect to any Bluetooth-enabled device to produce rich sound from above.

As part of Broan’s Roomside Series, the Sunrise Sensonic™ Speaker Fan’s EZDUCT™ Connector provides easy installation with no attic access required, giving it the flexibility to handle new construction or room-side retrofit installations. Once installed, the Sensonic Sunrise is “just right quiet” with enough sound to know the fan is ventilating.

The global leader in residential indoor air quality is also launching updated Sensonic™ 80 CFM speaker fans as well as Lighted Speaker Cover upgrade kit for their LED, Economy and InVent™ ventilation fans for customers who want an instant upgrade in their home. The easy-to-install covers require no professional installation and blend with any décor, providing an updated clean, and streamlined design.

To learn more about the Broan-Nutone, the Sunrise Sensonic™ Speaker Fan and/or the entire Sensonic series, please schedule an appointment to visit booth #C5223 at IBS 2020: <https://www.broan-nutone.com/en-us/ibs-2020>
