

Broan-NuTone® Debuts New Line of Sleek Chimney Range Hoods

Each range hood design provides a stunning focal point to your kitchen
with best-in-class protection from indoor air dangers

HARTFORD, Wis. (TBD) — In an effort to bring fresh air into every home, Broan-NuTone®, the industry leader in residential ventilation and air quality solutions has made top performing kitchen ventilation both accessible and beautiful with their expanded Broan Series chimney-style range hoods. The beautiful, yet affordable **Broan Series Classic Pyramidal, Low Profile Pyramidal** or **T-style** models will be available August 2020.

While these range hoods serve as an eye-catching focal point in the kitchen, they are simultaneously engineered to operate as a best-in-class protection point from indoor air dangers. Indoor air quality (IAQ) is up to 80% worse than air outdoors, with the kitchen often serving as the leading source of pollution. This is a serious yet underestimated concern for many households. Without proper ventilation, pollution, destructive particles and fumes from everyday routines such as cooking and cleaning can infiltrate a house in minutes.

For maximum protection against these dangers, Broan has equipped each range hood in the series with the powerful 450 MAX Blower CFM or 630 MAX Blower CFM to quickly remove smoke and odor from the air at a quiet 3 or 1.5 sones at normal speed.

All three range hood styles come with LED lighting and quiet operation to enhance both the cooking and overall kitchen experience. The hoods come equipped with dishwasher-safe hybrid baffle filters with quick-release latch for easy removal. Their sleek 3-speed soft touch or capacitive touch control features easy-to-clean surfaces, with lighted indicators for simple operation.

“Each signature model in the new Broan Series features sophisticated clean lines crafted to fit any dream kitchen so consumers don’t have to sacrifice personal style to have a range hood that gets rid of indoor air pollutants,” said XXXXX.
