BROAN EDGE

Compact without compromise.

A low profile ERV that can be mounted vertically to fit the tightest of locations.

VERSATILE
FITS ANY INSTALL

SELF ADJUSTS
ONCE BALANCED ALWAYS BALANCED

PERFORMS
IN ANY CLIMATE

Infield Selectable
Airflow Configuration

Versatile: Fits any install.

- Compact footprint for space constrained designs.
- Flexible installation options with one platform supporting. four configurations: door up, door down, horizontal or vertical.
- Easier integration into stacked mechanical areas and pre-engineered layouts.

Performs in any climate.

- Suitable for all North American climate zones from hot and humid to extreme cold conditions.
- One ERV serves all regions, reducing the need for climate-specific equipment schedules.

Self-Adjusts: Once balanced. Always balanced.

- Virtuo Technology: The only artificial intelligence technology that allows a ventilation system to do an airflow verification and auto-balance in all dwelling configurations and self-adjust to changing indoor and outdoor conditions.

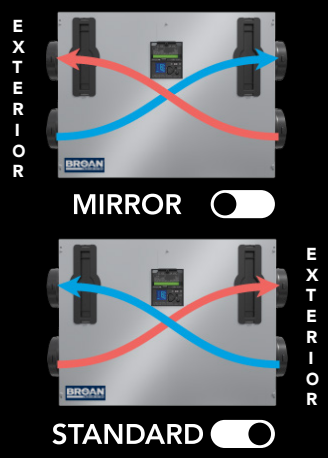

Infield Selectable

Airflow Configuration

Simplify installation with the flip of an integrated switch

- Spend less time on product location, ductwork routing, and install configuration.
- Eliminate the need to specify, stock or install different models.
- Accommodates standard and mirrored floor plans.
